## What is Netable?

Netable is a multimedia platform which transfers smart technologies used in modern medicine. It is a modular software which runs secure internet pages, clinical therapeutical programs, medical applications with online support or selected TV programs. Netable has been developed to increase living standards in healthcare facilities, serving at the same time for individual therapy in various areas of treatment and communication. The system can be configured according to the choice of individual modules that are supported by an on-line structured administration.

## Netable Options

Height and angle adjustable health care tables (Ehealth line) allow for different positions of visual projection and thus provide the less mobile patients with the ability to join individual or group therapy, rehabilitation, relaxation or education.

## How does Netable work?

Netable uses proprietary software that runs on Windows 10 in a basic optional modular configuration.

## Netable module functions

- Remote system administration on three levels
- Information on provider, e.g. a health care center, with options for advertisement slots
- Internal information for clients
- General information about social system
- Active therapy, therapeutical and rehabilitation programs
- Homebalance interactive system for balance training and fall prevention
- Web browsers with managed content
- Watching TV, videos
- Wikipedia - link to Wikipedia
- Weather - local weather
- News - current news

## 22" Netable Ehealth health care device

Flexible device for both in-house and outpatient use. The device is specifically designed for clinical environment. In-built 22" touch screen together with a micro PC and Netable application form a compact unit that has been tested for use in a clinical environment.

### Netable Ehealth technical data

- mobile ergonomic device
- different positions enable use for disabled clients
- easy height adjustment
- height range 720-1160 mm
- 4 levels of desk tilting
- micro PC, Windows 10, Intel C N3450, 30 GB SSD, 4 GB RAM
- external ports 2 USBs 3.0, 1 SD
- 22" LCD touch screen with specially tempered safety glass and waterproof surface
- remote support for Netable software, optionally also for clinical programs
- possibility of using telemedicine tools for patient support
- easy maintenance and cleaning

## 15" Ecompact health care device

This device has a shape of a compact suitcase and can be used both in clinical and home environment. It comes with a 15" touch screen with a flexible holder, micro PC and Netable application.

### Netable Ecompact technical data

- unlimited mobility
- flexible holder allows for a vertical presentation
- a powerful PC with Windows 10, Intel 6500TE Q Core 128GB SSD and 4 GB RAM
- specially tempered safety glass with a waterproof surface
- PC administration and software remote support
- protective compact case with a screen holder

Both the 22" and the 15" health care devices bring high performance and quality to telemedicine - virtual medicine under the demanding conditions of health care facilities and institutions. Netable devices are offered with administrator's support adapted to the installed modules and specialised software. They rely on powerful micro PCs with low-noise CPUs and tempered touch screens. Netable devices are high-quality compact products designed for commercial use in clinical environment. Warranty is two years.
